Merchant Payments — Offer Sheet & Field FAQ

Document ref: PAY-SALES-FAQ-03 | Version 1.4 | Effective 1 September 2026 | For: Payments field sales (FOS, Team Leads)

Training sample. This sheet is synthetic and was written for the Bajaj Finance M365 Copilot training (Payments – Sales batch, Oct 2026). Product names, prices, SLAs and rules are illustrative. Do not quote them to merchants — always use the current official pricing and product documents.

1. Products

1.1 **UPI QR** — static QR standee for the counter. No rental. No charge to the merchant on UPI payments.

1.2 **UPI QR + Soundbox** — QR with a voice-alert soundbox (English, Hindi, Marathi). Rental **₹99 per month**, waived for any month with UPI receipts of ₹50,000 or more.

1.3 **Android POS** — accepts cards, UPI and EMI on eligible cards. Rental **₹399 per month**, waived for any month with card receipts of ₹2,00,000 or more. Card charges as per the pricing grid for the merchant category.

1.4 **Payment Link** — share a link by SMS, WhatsApp or email. No rental. Suited to clinics, gyms, tutors and services.

2. Onboarding and Installation

2.1 KYC: PAN, a business proof (shop licence, GST certificate or Udyam) and a cancelled cheque or bank statement for the settlement account.

2.2 Installation SLA, counted from the lead date: **UPI QR 2 days · QR + Soundbox 3 days · Android POS 5 days · Payment Link 1 day**.

2.3 At installation, the FOS completes one live test transaction with the merchant, so the merchant sees the money and the alert arrive.

3. Activation

3.1 A merchant is **active** once the first customer transaction is received after installation.

3.2 Target: **80% of new merchants active within 7 days** of installation.

3.3 A merchant still inactive 7 days after installation gets a revisit within 3 days. After a second revisit with no transaction, the case goes to the Team Lead.

4. Settlement

4.1 Standard settlement is **T+1** (next working day) to the registered bank account.

4.2 Same-day settlement is available as an add-on for merchants with monthly receipts above ₹5,00,000, at an extra charge.

4.3 The merchant can see daily settlement in the merchant app or in the daily SMS / email summary.

4.4 A settlement difference is raised as a ticket; the target resolution time is **5 working days**.

5. Handling Common Objections

5.1 **"Customers pay cash."** Show the share of customers asking to pay by UPI; place the QR where the customer can see it; mention fewer change issues and a daily record of sales.

5.2 **"Soundbox rental is too high."** Explain the waiver in 1.2; compare one month's rental with the cost of one missed or disputed payment.

5.3 **"Settlement takes too long."** Explain T+1 and the daily summary; offer same-day settlement only where 4.2 applies.

5.4 **"Are there charges on UPI?"** No charge to the merchant on UPI payments (1.1); rental applies only to devices.

5.5 **"I already use another QR."** Lead with what is different (voice alerts in the local language, the app, the service visit); don't criticise the other provider.

6. Conduct and Data

6.1 Never ask for or note down a merchant's or customer's card PIN, OTP, UPI PIN or net-banking password.

6.2 Do not photograph or forward KYC documents on personal WhatsApp; upload them only through the onboarding app.

6.3 Do not promise pricing, waivers or settlement terms that are not in the current official documents.
